

Welcome to Fishtech Global

Fishtech Global would like to introduce you to our system for assisting the hobbyist with the maintenance of Their aquarium.

Maintaining an aquarium is exciting and very rewarding at first, but after approximately 6 months the aquarium maintenance becomes more complex and critical. Once the aquarium leaves the store your basically on your own for the daily routines that ensure long term success.

So what will Fishtech Global do for me? All we require is the type of aquarium or aquariums you own and we will send you weekly emails outlining the daily maintenance required during each week.

We even include reminders if some tasks are possibly overdue. The aquariums success is very dependent on keeping the water changes, filter cleaning, water testing and many other chores on schedule.

Any tasks that fall overdue will result in a decline in the water quality and will result in bigger problems later.

If you aquarium is a Goldfish aquarium, Exotic Goldfish aquarium, Tropical, Planted Marine or reef aquarium we have a mapped out routine for you.

In todays busy lifestyle, remembering when to change the aquarium water, clean the filter or replace the filter inserts is very difficult to keep track of. Fishtech Global make this easy as your diary of tasks is sent to your inbox.

This reduces the stress of owning an aquarium and will save you money and time in the long term.

Our daily chores list may be repetitive especially when it comes to feeding the fish as this is the biggest mistake hobbyists make. Overfeeding the fish causes the aquarium to become very dirty and an unhealthy environment for the fish.

An unhealthy environment will cause the fish to become sick, and the aquarium will become filthy with algae growth. We will share our simple formula on correct feeding of your fish.

Fishtech global also has exclusive videos to give you guidance on some of the tasks, and very helpful tips on maintaining your aquarium as well as access to advice direct from a biologist.

All this for only \$1 a day, seems too good to be true.

You can also cease your subscription at any time.

All Fishtech Global needs the type of aquarium you own, and we will do the rest. Even if your aquarium is a Reef aquarium with LPS or SPS corals we can send daily tasks for dosing coral food and trace elements and service intervals for your pumps.

Fishtech Global is your partner in taking care of your aquarium.
